

Mound View Cemetery

Self-Guided Walking Tour

Mound View Cemetery

Mound View Cemetery is located in the northern part of Mount Vernon and is owned and operated by the City of Mount Vernon. It is made up of just over 61 acres.

Mound View Cemetery was established in 1833 and is named after an ancient Indian mound, which is located in the western part of the cemetery. There were no complete records kept until 1853. There are burials whose death dates occurred prior to 1833; however, it is believed that most were persons who were moved here from the Presbyterian Cemetery, which was located behind the Presbyterian Church at about 105 East Chestnut Street.

According to Ms. Blanche George, a former clerk at the Cemetery office from 1937 to 1947, there were no full-time clerks until a couple years before she came to work here. Prior to that, the sexton or the superintendent of the Cemetery maintained the records.

There are many persons interred in the cemetery that were important, both to local and national history. Some of those persons, special monuments and buildings are listed in the self-guided walking tour. The numbers in front of each listing are to be used as a reference point in locating the listing on the Mound View Cemetery map.

The information contained in the tour was gathered from some of the histories written about Knox County, from news articles and from obituaries on file at the Cemetery office.

We hope you enjoy the little bit of history provided by the tour and any comments or suggestions for improving it will be welcomed.

46. Mound

The following information is courtesy of Mr. Guy VanNostrand. "This mound was probably constructed by the "Mound-builders" in this area known as the Adena Indians, who lived in this part of Ohio from about 1000 BC. to 200 AD. This mound was opened in the summer of 1845 by Aaron Loveridge, and one skeleton of an Indian was found in a sandstone tomb at the original ground level. On July 30, 1894, James W. Hall and another Mound View Cemetery sexton were digging a grave for Henry G. Cooper on the edge of the Mound. They dug into a grave that contained the remains of an Indian, and found the following artifacts: an iron tomahawk-pipe, a copper breastplate, a copper bracelet and a shell necklace. It was the custom of most Indian tribes to bury personal belongings with their dead, especially a chief or person of rank in a tribe. A Delaware Chief named Sac-A-Manc was killed near Mount Vernon around 1812, and it is possible that members of his tribe could have buried him in the Mound View mound." The mound has been used in more modern times for the burial of the Cooper and Curtis families, to name a few.
